

New York, USA

DIGITAL STORAGE SOLUTIONS PROVIDER OF THE YEAR

LifeStream Digital Innovations

Developed in New York, LifeStream Digital Innovations® is a cutting-edge cloud-based solution for digital storage and portfolio management. LifeStream's Founder and CEO, Anne Sullivan, was inspired to develop this innovative platform after recognising the difficulties that individuals – such as her own son – had experienced in attempting to stand out and showcase their skills within an application process. As a result, Anne spearheaded the development of LifeStream Digital Memory Box® – an online platform that enables students to seamlessly and effectively curate, create, and share their unique portfolios with admissions officers, coaches, and professors at high school and college levels. Today, LifeStream's solution goes far beyond educational needs and has helped young professionals enhance their applications for apprenticeships and graduate roles.

The versatile LifeStream platform enables users to securely store and present all types of cherished memories, achievements, skills, and more in an online solution that can store assets of virtually any digital format. Personal highlights, professional skills and important documents are captured across a variety of digital platforms today, and LifeStream has ensured these assets are secure, organised, and as accessible as desired by ensuring every file benefits from dates, detailed descriptions, and categorisation. The company's innovative technology has encouraged users to showcase their talents and unique skills, whilst it has made preserving cherished memories easier than ever before. The LifeStream Portfolio solution is perfect for education and employment applications, as it helps schools and employers gain a better understanding of the candidate's unique skillset and suitability.

The judging panel was particularly impressed by the versatility of the company's innovative solution, which can be used for educational, professional, and personal reasons and can be accessed from any device. In a digitally driven age in which gaining insights quickly and easily online is important, LifeStream Digital Innovations has developed the perfect solution. All assets, memories, and content held within LifeStream Digital can be shared just as easily as it can be stored securely and privately.
